# Detectors

## **X-Tec Tracker Lite:**

- Powerful & compact hand-held 22Hz & MFL detector/locator.
- Digital bar graph signal display.
- Built-in solar cell.
- Pager notifies of passages with buzzer, LEDs & vibration.
- Includes two rechargeable power packs.

## **X-Tec Tracker: Wireless 22Hz & MFL Detector**

- Compact wireless 22Hz/MFL detector and locator with data logging.
- Monitor and log live run status on any Android device.
- Easily view and analyze run data with proprietary windows program.
- Download logged detections via Bluetooth.
- Over-the-air updates.
- Integrated solar cell.
- Includes high output ground sensor.
- Two rechargeable power packs.
- 150' line-of-sight range.
- 50' range though multiple obstructions.
- One-touch detection mode selection for XMT/MFL or both simultaneously.
- Over-the-air program updates.
- Detections speeds up 35'/second.

**Customers report 20% better detection results and fewer false detections than other leading detectors.**

## **X-Tec Tracker Pro:**

### **Wireless 22Hz / MFL Detector & Geophone**

- All the features of the X-Tec Tracker with a built-in wireless geophone.
- Integrated solar cell.
- Includes patented high output ground sensor.
- Pocket geophone audio receiver.

## **X-Tec AGM**

- Pre-deployable
- Built-in solar cell extends battery life indefinitely.
- One-touch detection mode selection for XMT/MFL or both simultaneously.
- One-touch sensitivity settings.
- Bluetooth downloads.
- Easily view and analyze run data with proprietary windows program.
- Wireless program updates.
- Detection speeds up to 35'/second.
- Uses 6 C cells: 5 days battery life to indefinite with solar.
